

CAREER OBJECTIVE

Aspiring Software Developer with strong knowledge of C++, Data Structures & Algorithms, and MERN Stack. Passionate about building scalable applications and solving real-world problems through efficient software solutions. Seeking an internship opportunity to apply my technical skills in a professional environment.

EDUCATION

Budge Budge Institute of Technology, Kolkata

August 2023 – July 2027

Bachelor of technology; GPA : 8.30

SKILLS SUMMARY

- Languages:** C, C++, Python, JavaScript, SQL
- Web Development:** HTML, CSS, JavaScript, React.js, Express.js, Node.js
- Databases:** MySQL, Mongo DB
- Developer Tools:** Git, GitHub, VS Code, Postman

PROJECTS

SmartSeva – Crowdsourced Civic Issue Reporting System

- Developed a civic issue reporting platform that allows citizens to report problems using photos, videos, text, or voice with automatic GPS tagging.
- Implemented a web dashboard for municipal authorities to visualize complaints on a live city map and manage issue resolution.
- Designed a task assignment system where administrators can assign issues to contractors and monitor progress through status tracking.
- Built the application using HTML, CSS, JavaScript, Node.js, Express.js, and SQL.

JanSaarathi - Community Based Disaster Reporting System

- Developed a disaster reporting platform enabling citizens to report incidents in real time using text, images, or videos.
- Implemented geotag and timestamp verification to improve report authenticity and reliability.
- Designed a community dashboard with Google Maps integration to visualize disaster reports and assist authorities in quick response.
- Built features for emergency alerts, disaster updates, missing persons tracking, and helpline information.
- Developed using HTML, CSS, JavaScript, Node.js, Express.js, and SQL.

Personal Portfolio Website

- Designed and developed a full-stack personal portfolio website to showcase software projects, technical skills, and achievements.
- Implemented a dynamic project management system allowing projects to be added, updated, and displayed through backend APIs.
- Built a responsive and user-friendly interface to ensure smooth experience across desktop and mobile devices.
- Integrated GitHub repositories, live project demos, and a contact form to enable easy interaction with recruiters and collaborators.
- Tech Stack: HTML, CSS, JavaScript, Node.js, Express.js, SQL.

CERTIFICATIONS

Data Structures & Algorithms in C++ – Physics Wallah (PW Skills)

January 2026

- Completed a structured course covering arrays, linked lists, stacks, queues, recursion, trees, and dynamic programming.
- Practiced problem-solving and algorithm optimization using C++.

COURSE WORK

- Data Structures and Algorithms
- Web Development
- Database Management System
- Object-Oriented Programming
- Software Methodology
